PREMIUM SCENTING

40%
of customers
stay longer in a
pleasantly
scented
environment

Smell is the most powerful of our 5 senses

Introducing Premium Scenting

Initial Premium Scenting is an exciting new way to express your brand and to enhance customer experience in your premises.

By uniformly diffusing a specially selected fragrance into the air, Premium Scenting helps create a unique and memorable ambiance, which visitors will associate with your brand.

Stand out from the crowd

In today's noisy world, we have become used to receiving visual and auditory brand messages. Initial Premium Scenting uses the subtle yet powerful sense of smell, to add an extra dimension to your brand message.

Scents are selected to complement your brand image. They become part of the total experience and customers recognise that a particular scent 'belongs' to a particular brand.

Uniqueness of scenting

All of our diffusers ensure equal distribution of scent. The microscopic scent particles are a 1/125,000 times the weight of an aerosol droplet, enabling the scent to hang in the air for up to 16 hours.

By contrast aerosol droplets, which are usually emitted from women's perfume bottles or traditional air freshener units, are much larger. The weight of these droplets means they fall to the ground soon after being sprayed, giving uneven distribution and leaving wet deposits.
